HYDRO-MASSAGE

fluvo® HYDRO-MASSAGE

Gentle regeneration

fluvo® hydro-massage transforms your pool into a wellness oasis. The nozzle technology is based on a vortex chamber with air admixture, which enriches the water jet with countless air bubbles. This creates a gentle and soothing massage with optimum effectiveness that can be felt deep, deep down.

Many muscles of our body are accessible to hydro-massage. The use of different massage strengths placed at different heights enables the targeted massage of individual body parts such as the back and leg muscles as well as the foot reflex zones.

Hydro-massage from **fluvo®** is a practical investment in your health and a substantial contribution to the quality of your life. It also brings the fun into swimming in your pool.

PRODUCT-HIGHLIGHTS
