COUNTER CURRENT SYSTEMS

karibic COUNTER CURRENT SYSTEMS

Fitness and massage

The counter current system karibic scores with maximum flexibility. The modular design enables the combination of several counter current nozzles. Various designs are available in stainless steel or white composite. Some versions offer the additional option of a massage function by connecting a **fluvo**® massage hose or massage nozzle.

To match the nozzle design, select the desired activation option, the position of which can be freely selected. The counter current nozzle can be swiveled in all directions with all versions except the fixed version. Air is added automatically. Due to their compact design, karibic counter current systems are ideal for installation in stairs.

PRODUCT-HIGHLIGHTS

- ▶ Modular installation possible
- ▶ Massage function optional
