1. General information

For your own safety and to protect the product, please read the Operator's Manual carefully before starting with the settings and the installation!

1.1. Warranty notice

Failure to comply with the information provided in this operator's manual voids all claims under warranty.

1.2. Introduction

The luchs NT Spot | luchs NT2 | luchs NT56 Spotlight is an independent lighting unit for illuminating swimming pools. The lighting unit consists of the Spotlight and corresponding control unit.

All listed diaphragms are available on request in high-gloss polished or white coated version available.

1.3. Proper use

The luchs NT Spot | luchs NT2 | luchs NT56 is a stationary functional unit consisting of a Spotlight and control unit.

- The Spotlight is designed for continuous use under water (IP68 to a depth of 5m).
- The luchs NT Spot | luchs NT2 | luchs NT56 Spotlight may only be operated under water.
- The control unit is designed for DIN rail mounting in a heat-diverting control box.
- Using the device in a manner other than what is described in these operator's manual may result in damage to the product and shall void all claims under the warranty.

Fig. 1 Exemplary illustration

In the installed state of the spotlight it must be ensured that a free water circulation is guaranteed by the headlight housing!

1.4. Usage limits

The materials are designed for chlorinated water (at swimming pool concentration) and optionally for salt water (up to 5%) (on request).

Observe maximum permissible water temperature of 36°C!

1.5. Cable protection system

Always guide the cable protection cover up above the level of water in the pool. Lay the cable protection cover with long bending radii so that the Spotlight connection cable can be drawn in with no problems.

An extension of the cable protection cover is available on request (see also 72242 Installation information for cable protection system).

2. Safety Instructions

	<p>Danger of lethal electrical current!</p> <p>Electrical connections must only be made by a professional electrician in accordance with VDE Regulation 0100. Observe the local requirements of the responsible electrical power provider as well as standards and safety requirements for electrical systems in swimming pools.</p>
--	---

In case of damage caused by failure to observe the information provided in these operating instructions, all claims under warranty shall be void. Also, if the devices had been opened. The manufacturer cannot accept any liability for resulting consequential damages.

Unpack the luchs NT Spot | luchs NT2 | luchs NT56 Spotlight and control unit. Before using the device, make certain there is no damage caused by transport.

	<p>The luchs NT Spot luchs NT2 luchs NT56 Spotlight must only be operated with the control unit designed for it by the manufacturer.</p>
--	---

2.1. General information

- Use the system only when it is in flawless condition technically and according to its intended purpose. Be conscious of safety and dangers and observe all the instructions of this Operator's Manual!
- Eliminate malfunctions without delay.
- Before making repairs to the system, disconnect it from its electrical power source and prevent it from being turned on again.
- Repairs of any nature must only be made by qualified professionals.
- The device must only be used when it is in flawless technical condition.
- If serious operating problems occur, disconnect the system from the electrical power source.
- Check the device and the electrical power line at regular intervals for damage.
- Attention: The luchs NT control unit is still capable of conducting dangerous voltages for a short time after it is turned off.

2.2. Abbreviations

- A Pre-fabricated pool
- B Concrete-tile pool – without liquid sealing (string foil)
- E Stainless steel pool
- H Concrete-liner pool
- S Concrete with brushed applied sealant pool + optional tiles
- W Wooden-liner pool or similar (with additional film sealing)
- N Retrofitting

2.3. Marking

	Caution! Risk of injury! / Attention! Risk of damage! This symbol warns of hazards due to mechanical effects and of actions that will damage the product.
	Caution! Danger of death! This symbol warns you of dangers due to electrical current.
	Information
	Important note!

2.4. Safety instructions for the operator

	Please ensure that the users have read and understood the manual before operating the system. Not the users, but the owners (operators) are responsible for the safety.
---	--

The operator must ensure that:

- The instruction manual is always readily available to the users,
- The instructions in the manual are followed,
- The system is immediately stopped should abnormal voltages, temperatures, noises, vibrations, leakages or other faults occur.

All persons involved in setting up, commissioning, operating, maintaining, and repairing this device must:

- be appropriately qualified
- meticulously observe the operator's manual
- consider the operator's manual to be part of the product
- keep the operator's manual in a safe place throughout the service life of the product
- forward the operator's manual to each successive owner or user of the product
- ensure that all additions that are received are inserted into the operator's manual
- observe all legal requirements

3. Dimensions

All dimensions in mm.

3.1. luchs NT Spot and luchs NT2 Spotlight

	B	E	T
-A	10	79	41
-BS	8	94	56
-E	8	81,5	.
-H	10	94	56

3.2. Iuchs NT56 Spotlight

4. Other applicable documents

In addition, the notes and information in the operator's manual 27142 – Iuchs NT-LED/RGB apply

- 27136 Installation templates for pressembled pool
- 27253 Information about stainless steel
- 72242 Installation information cable protection system

5. Preparation for Installation and Assembly of luchs NT Spot

Fig. 2 Maximum permissible installation depth – please observe!

5.1. Installation instructions for concrete pool installation kit

Attention!

Make certain before concrete encasing that the installation kit is horizontal, assembled to correct dimensions, and secured from moving (on the pool wall or form wall). It will not be possible to adjust it later.

Fig. 3 Delivery condition: left - standard model; right - version with stainless steel installation housing

Für Folienbecken unbedingt Einbaugeschäse um 90° gedreht einbauen!
Schalungsbolzen in der gelben Markierung verwenden und SENKRECHT ausrichten!

With liner poolst he installation kit
Should be rotated 90°!
Use the shuttering screws in the
Yellow marked area and align
These vertically!
