BLACK DIAMOND LINE

EXHILARATING,
STYLISH AND
CAPTIVATING!

fluvo[®]
innovative schwimmbadtechnik

The Black Diamond Line stands out with its clear elegant design, and exceptional feel. Whether for new construction or retrofitting, the Black Diamond Line offers pool owners new perspectives for personalizing their own bathing landscapes.

fluvo[®] deliberately uses black. This creates a clear, distinct, and quickly identifiable design language that presents massage jets, counter-current systems, and LED underwater spotlights in a completely new context.

The focus in the development and market launch of the new Black Diamond Line is on exclusivity, appearance, and high quality. The target group is customers who want to equip their pool with a unique, individual look and rely on the exceptional qualities of fluvo[®] swimming pool attractions.

The Black Diamond Line from fluvo[®] at a glance:

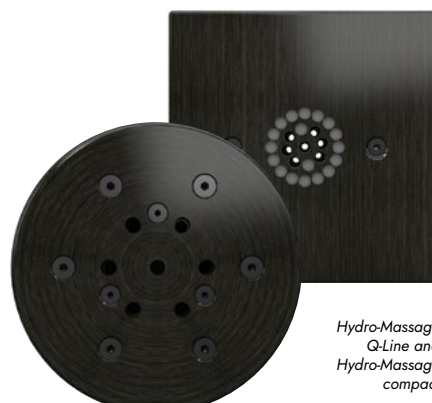

- Innovative surface finishing with exceptional hardness and scratch resistance.
- Clear elegant design, and exceptional feel.
- Available for counter-current systems XANAS[®], XANAS[®] Q-Line, and X-jet, luchs[®] underwater spotlights, as well as hydro-massage jets from the compact and Q-Line series.
- Of course, the Black Diamond Line can also be controlled with the myfluvo[®] app. Creating individual training and massage programs has become a "must-have" for fluvo[®] customers and is now an indispensable part of pool enjoyment.
