

POOL DESIGN
AS LIFESTYLE

WHERE AMBIENCE MEETS INNOVATION

Whether generously sized or space-efficient in design — the pool is increasingly becoming a central element of spatial composition. Its function is no longer the sole focus; instead, its ambience takes center stage. Architects and planners are placing greater emphasis on holistic design. Only through the interplay of design, materials, color, and light does the pool become a true expression of individual lifestyle.

MATERIALS

DIAMOND LINE: UNIQUE, STYLISH AND CAPTIVATING

Transform your pool into a design statement with the Diamond Line: A unique aesthetic and elegant design language combined with an extraordinary tactile experience — perfect for pools with a truly distinctive presence! The surface refinement, based on diamond-like materials, not only delivers a captivating color effect but also preserves the individual surface texture and the outstanding mechanical properties of inox.

PURE INOX: TIMELESS AESTHETICS AND ELEGANCE

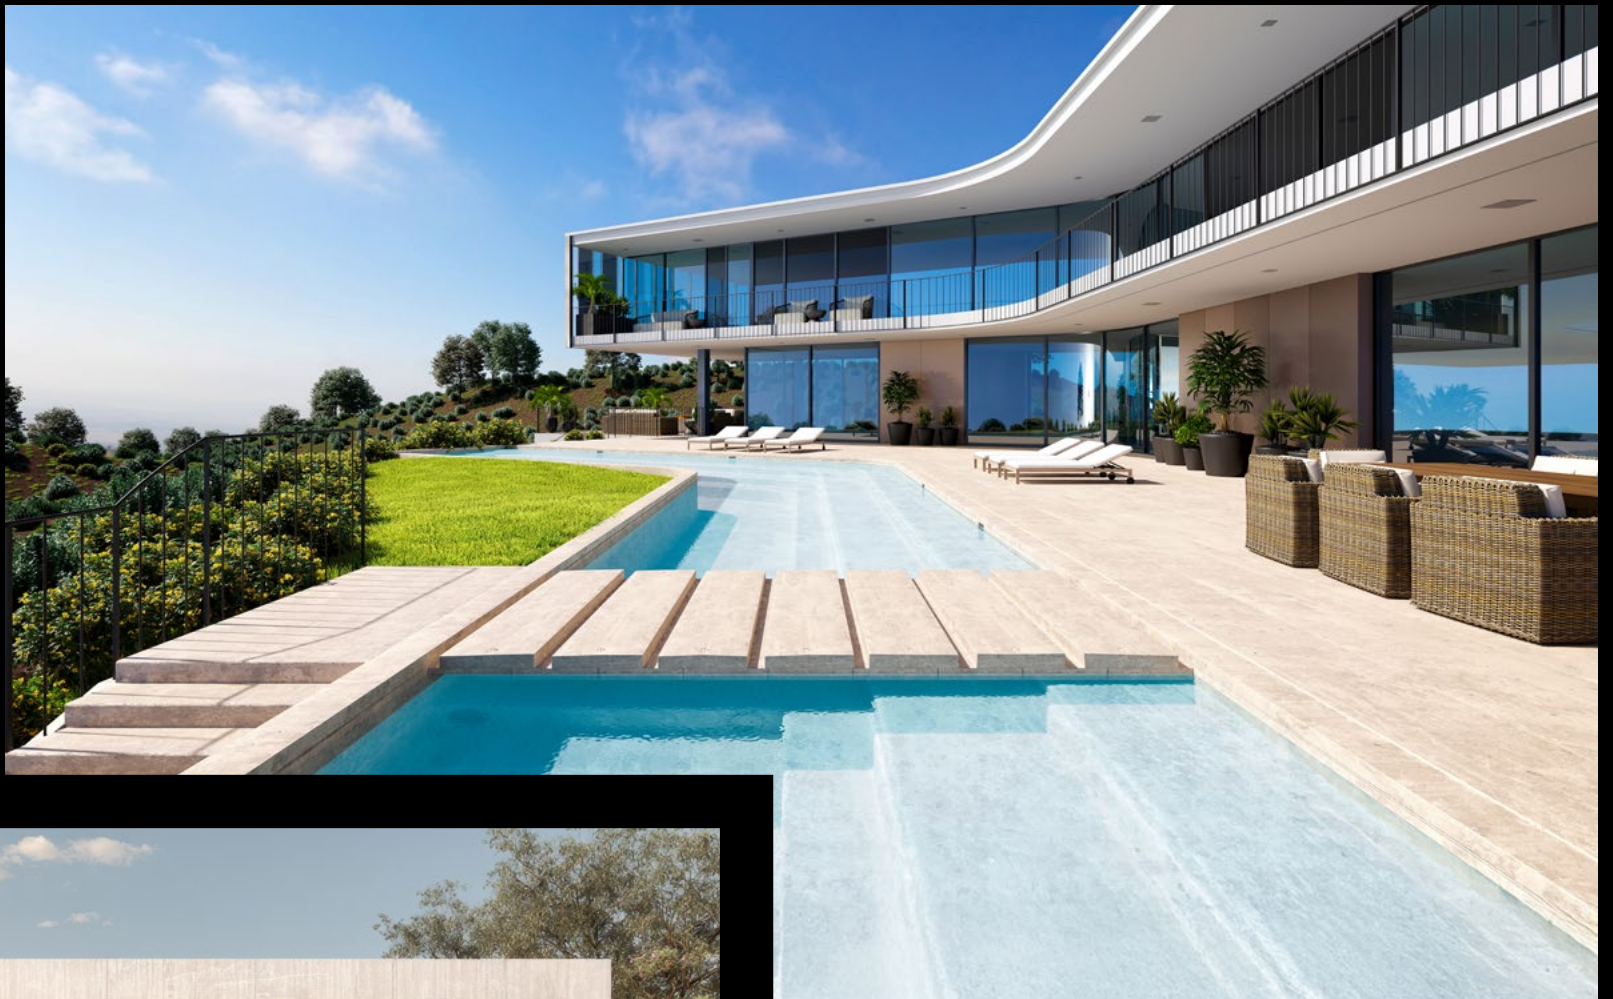

Whether with a textured matte finish or a high-gloss polished surface — both variants impress with timeless aesthetics paired with remarkable functionality: scratch-resistant and highly durable.

SATINLINE

Experience modern elegance and exceptional durability — the refined stainless steel look of Satinline by Behncke blends seamlessly into any setting.
